Sinclair's summer giveaway

In a bid to boost summer sales, Sinclair Research is giving away £56-worth of software with every 48K Spectrum sold.

It was one of a series of announcements made to dealers.

The six software titles to be given away are: Chequered Flag, Scrabble, Survival, Chess, Make-a-Chip and Horace Goes Skiing.

Retail business manager Anton Boyes said: "We have chosen the best from our range. We are not — as some manufacturers have done — clearing our stocks of old programs."

Sinclair is spending £¼m advertising the six-pack offer, which ends in late October, and another £4m in the run up to Christmas.

The other announcements:

- For existing Spectrum owners, Sinclair is packaging a Microdrive, Interface 1 and
- Continued on page 5*

Software while you wait

New software could be in the shops faster — by phone.

Retailers are being offered a computer which will load cassettes, discs or cartridges from a hard disc containing 1,000 titles.

A central computer, based in Edinburgh, is to update by phone line the range of stored programs as well as log sales for billing.

Program Express, which is importing the system from America, says John Menzies will have five installed from October.

The benefits, says Program Express, include cutting costs on stock and manufacturing and eliminating unsold goods.

However, each shop has to keep blank cassettes, discs and cartridges along with inlay cards and any manuals the software may need.

The Software Machine costs £95 a week on a three-year lease, including service, and one

Continued on page 5

The Key To Success!

Now, with the new Stonechip Spectrum Keyboard, the user has no worry of damaging the Spectrum itself as improved designing enables it to fit the case perfectly.

Assembling the case is simple as it consists of two halves, the top half containing the keyboard, with a small printed circuit board, attached by ribbon cable, plugging into the rear of the Spectrum. The lower half fits precisely around the Spectrum, thus preventing any risk of damaging through movement.

Your Sinclair guarantee need not be invalidated since the Spectrum does not require removal from its case.

THE MAIN FEATURES OF THE KEYBOARD ARE:

- No modifications to Spectrum necessary as it connects via rear port.
- Full-length space bar.
- Built-in 'Echo' amplifier and tape interface.
- RESET keys remove the need to disconnect power supply lead.
- Single key 'DELETE'.
- Single key 'Extended Mode' selection (ie one key replaces the CAPS SHIFT and SYMBOL SHIFT function).
- Fully compatible with Interface 1 and most peripherals.

You could be on our pages

We welcome programs, articles and tips from our readers. If you feel that your work meets our standards, please submit it to us for consideration for publication.

- Programs must always be sent on cassette. Listings are helpful, but not necessary. Check carefully that they are bug-free. Include details of what your program does, how it works, variables you have used and hints on conversion.
- Articles on using home computers should be no longer than 2,000 words. Don't worry about your writing ability — just try to keep to the style in HCW. Articles most likely to be published will help our readers make better use of their micros by giving useful ideas, possibly with programming examples. We will convert any sketched illustrations into finished artwork.
- Tips are short articles, and brief programming routines. Your hints can aid other computer users.

All submissions will be acknowledged and the copyright in such works which will pass to Argus Specialist Publications Ltd will be paid for at competitive rates.

Keep a copy of your work and include an SAE. Label everything clearly and give a daytime and home phone number if you can.

All work for consideration should be sent to:

Paul Liptrot, Home Computing Weekly,
No. 1 Golden Square, London W1R 3AB

It's easy to complain about advertisements. But which ones?

Every week millions of advertisements appear in print, on posters or in the cinema.

Most of them comply with the rules contained in the British Code of Advertising Practice.

But some of them break the rules and warrant your complaints.

If you're not sure about which ones they are, however, drop us a line and we'll send you an abridged copy of the Advertising Code.

Then, if an advertisement bothers you, you'll be justified in bothering us.

The Advertising Standards Authority. ✓
If an advertisement is wrong, we're here to put it right.

ASA Ltd, Dept 2 Brook House, Torrington Place, London WC1E 7HN

Giveaway

From front page

four Microdrive cartridges as an Expansion System, for £99.95. On the cartridges: Tasword II for word processing, Masterfile, and Quicksilver's 3D Ant Attack and Games Designer, plus demonstrations and utilities.

● The Sinclair QL goes on retail sale from September 1 and all mail order will end then. The company's pocket TV will be in the shops from mid-September at £99.95.

Although production had been increased, Sinclair managing director Nigel Searle warned that demand for the QL and TV would probably exceed supply.

Two new subcontractors had been appointed to make Spectrums which, he said, would double production to more than 2000,000 a month by the end of the year.

Sinclair Research, Stanhope Rd, Camberley, Surrey GU15 3PS

Software

From front page

estimate is that the retailer would have to sell 55-60 products from it to break even.

An expansion to the machine uses colour graphics to attract attention and offer demonstrations.

● A similar idea is used by a system called Romox, but this only takes electrically reprogrammable cartridges.

Program Express, 23 Dalmeny St, Edinburgh EH6 8PG

US prize-winner

Precision's Superbase 64, the programmable database for the CBM 64, recently won the top Showcase Award in its category at the Consumer Electronics Show in Chicago, Illinois.

Superbase 64 has been on the US market for seven months and Precision claims its sales are running in excess of 3,000 units a month.

Superbase 64 is a database management and information retrieval system which uses B+ tree indexes. It offers menu-driven operation, direct commands to the database or use of a user programmable interface.

Precision, 6 Park Terrace, Worcester Park, Surrey KT4 7JZ

Prizes all round

This is the solution to our Silversoft wordsquare. **Horizontal:** Exterminator, Slippery Sid, Alien Dropout, Zorbiter, Sam Spade. **Diagonal:** Muncher. **Vertical:** Asteroids, Robot Riot, Freez Bees.

These are our 84 winners who will each receive software to the value of £12 from Silversoft: J. Alba, London SW1; E R Robinson, Norfolk; Gregory Smith, Lincs; Ian Powell, Norfolk; S Phillimore, W Yorks; T J Ferrett, Surrey; N F Owen, Gt Missenden; Mr S Summerscale, Staincliffe; Mr P Taylor, Northfield; Andrew Beard, Cannock; P J Willcox, Cardiff; Mrs T M Britton, Llantwit Major; Fiona Sturrock, Edinburgh; Derek Ward, Nottingham; Frank Winand, Brentwood; Kevin Grieves, Hitchin; B Cairncross, Tyne & Wear; R D Taylor, Birmingham; Carlos Abrahams, Derbyshire; Mr E Richmond, Selby; Glenn Parry, Cardiff; S Cook, Bradford; Tim Prince, Cumbria; A M Spayes, Abingdon; T J Slater, Chessington; Stephen Anderson, Dunbartonshire; David Gerrish, Basildon; Mark Pepperrell, Feltham; Gregory Wisken, Hockley; G Collins, Redcar; A B Coope, Notts; Toby Robinson, London W4; Anthony White, East Ham; Ross McDonald, Uttoxeter; Jonathan Cooper, Melton Mowbray; Mrs J Smith, Birmingham; Peter Teare, Newcastle upon Tyne; William J Fox, Matlock; Jennifer E Anderson, Ayrshire; Peter Atkins, W Sussex; Joseph Harper, Erskine; Simon Thompson, Abingdon; Svend Falck, Shape, BFPO 26; J R Allison, Suffolk; David Walker, Hednesford; C Beveridge, Dumfriesshire; Brevil Brown, Birmingham; David Black, Glasgow; Colette Campbell, Dunleer Co Louth; Mark A G Kent, Lincs; Brian Buckley, Dungannon; N Lucas, Edinburgh; Alan Taylor, Merseyside; Mr G E Morris, Portsmouth; Mr C Hale, Newport; J A Drennan, Ayrshire; P Wardell, Colne; Andrew Fox, N Yorks; Mr R A Abramson, Suffolk; Simon Heather, E Grinstead; Andrew D Gardner, W Sussex; T V Jones, Worcs; Michael Slater, Lancashire; Stephen Cartwright, W Midlands; Mr D Kinsella, Greater Manchester; Christopher White, Worcs; S G Mitchell, Basingstoke; Robert Amey, Norfolk; Terry Newman, Norwich; Mr P W E Camp, Cowley; Andrew Cross, Bristol; Michael Bond, Manchester;

Christopher Hall, N Ireland; Peter Gent, London SE9; Richard Kunzer, Durham; Jason Leitch, Strathclyde; J Newman, Ryde; Adrian Davis, Dublin 14; Upendra Manandhar, London W1; Mr Nigel Mortimer, W Yorks; Michael D Pugh, Lancs; W T Abram, Cheshire; Marcus Prescott, Burton-on-Trent; Mark Pettifer, Wantage, Oxon.

Round of applause

The answers to our Romik wordsquare were: **horizontal:** Loch Ness Monster, Zorgons Kingdom, Fools Gold, Atom Smasher, Multisound Synthesizer. **Vertical:** Shark Attack, Cyclops, Birds of Prey, Pottit, Caterpillar, Alien Break in. **Diagonal:** Zappy Zooks, Silicon Romik Cube, Floyds Bank, Quadrant, Animal Magic, Colour Clash, Forth, Sub.

Dicks Diamonds, Romik's best selling game, was on the second line but was missed out from the list of titles. Well over half the winners discovered Dicks Diamonds. Well done.

These are the 116 winners of Romik Software: A Tulett, Petworth; G Davis, D O'Callaghan, S Hulme, Southampton; J McWilliam, Runcorn; J Roche, Poole; J Brennan, Waterford; W Asghar, R Banks, H Bray, G Chiu, P Cross, E Desequ, G Lam, K Moghadam, A Samworth, P Scott, G Theodorou, G Tong, London; R Foster, Doncaster; K Frost, Luton; P Moloney, Dublin; A Brain, P Serbert, Harrogate; A Turner-Howe, Basingstoke; A Cartwright, Hull; S Esterbrooke, Rochester; I Newton, Chepstow; K Ferguson, R Mahoney, Blackpool; M Perkins, Wallington; G Summerfield, Newcastle; F Reed, Hoddesdon; A Denby, Alcester; P Fairbairn, Stockport; W Bolt, Plymouth; R Tester, Hurstpierpoint; A Clarke, Atherstone; C Bidmead, Gosport; C Garbutt, Harlepool; M Hunt, Milton Keynes; P Shepherd, R Sisson, Nottingham; N Clark, Bracknell; S Clegg, Colne; N Collier, A Goode, D Ohren, P Taylor, A Waller, Birmingham; C Gee, Chorley; O Hord, Welwyn; L Haley, S Hulme, K Tonge, Manchester; C Catchmole, Carnforth; D Allen, Warley; D Porter, Rochford; M Pitt, S Bambridge, Norwich; C Cawley, C Crane, Stock-on-Trent; P Smithwhite, Jarrow; A Kempster, Heywood; A Blair, PFPO 42; R Gardiner, A Shirley, Leicester; G Beavis, Derby; D Parish, West Wickham; J Woffenden, St Albans; A Cairns, Surbiton; R Kinghan, Reading; D Hughes, Bury; A Gould, Slough; R Waugh, North Shields; M Booker, Chesterfield; K Bardon, York; M Cordwell, Chelmsford; D Houghton, Mitcham; M Etienne, Belgium; R Edwards, P Robins, St Helens; M Mills, Clifton; P Pointon, Walsall; P Golding, Sudbury; K Wassell, Thetford; P Clothier, New Milton; A Jones, Coventry; G Holmes, Brighton; D Clark, Peterborough; N Hurst, Lewes; A Barrett, Meagoed; R Henthorn, Newport; A Johnson, Northampton; R Lacchin, J Lee, Gloucester; R Poston, Horsham; P Lee, Cheltenham; C Sevenoaks, Raynes Park; B Hackett, Blackburn; L Isbister, Biddleswade; I Powell, Liverpool; R Johnson, J Knapp, Stevenage; D Aucott, Wigston Magna; G Johnston, Bolton; A Acton, Stafford; C

Baker, Bridgwater; R Johnson, Portsmouth; J Church, Waltham Abbey; H Stephens, Maldon; M Whitaker, Doncaster; M Crossan, Stabane; M Cass, Aylesbury.

Sinclair winners

Here's the solution to our Sinclair Research wordsquare. **Horizontal:** Cyrus-is-chess, Planet of Death, Inca Curse, Backgammon, Ship of Doom, Maths, Music, Vu-Calc, Flight Simulation, Sabotage, Planetoids, Embassy Assault. **Vertical:** Chess, The Hobbit, Flippit, City Patrol, Spelling.

First prizewinner, Alex Patterson, of Berwickshire won £100 of Sinclair software. Second prize of £50 of Sinclair software went to Mr D Smith, of Slough.

These are our 34 winners of £25 of Sinclair software: Mr M Cooper, Letchworth; Mrs N Manji, Chelmsford; Master J R Wilson, Notts; Matthew Roach, Exeter; Mr D J March, N Yorks; David Richardson, Leeds; Mr K W Carr, Rhyl; Miss I J Moorshead; C Thompson, Notts; Mr A Butcher, Birmingham; Ian Lester, Cheshire; Mrs B Prowse, London NW5; Ian Caldwell, Cleveland; D T Pascoe, Gloucester; Mr C E Stones, Bracebridge; Michael Jordan, London N21; Matthew Carter, Cowcliffe; Andrew Howe, Wilts; Margaret Nobbs, Coatbridge; M J Trumper, Harrow; Mr D E Nicholls, London WC1; Jason Crawley, Basildon; Mr C F Turner, Scunthorpe; Mark Hamans, L/Spa; B Morris, Rochdale; Gary Moore, Cheshire; Mr I Field, Lancs; John Schofield, Blackburn; Graham Rowley, Worksop; Mr I Joyce, Loneon E17; J Baldwin, Lancs; Koon Loong Chan, Oxon; D G Houghton, Surrey; Mark Pepperrell, Middx.

GOSH new recruit

Bubble Bus is the latest company to join GOSH (Guild of Software Houses). Mark Meakings, director, said: "Piracy is beginning to destroy our industry and GOSH gives us the opportunity to fight it with other software houses."

He continued: "Our industry is currently going through a shake out, and it will go on to mature and prosper. If any of us are to survive we must stop the pirates so we can ensure adequate investment in new products."

Spectrum Sprites 48K Spectrum £7.95

ISP Marketing, 15a Castons
Yard, Basingstoke, Hants

Shades of the music industry! Now software houses are putting out singles of hit tracks from their published programs. This is the Sprite Designer/Operating system which formed part of ISP's SCOPE-II. There's a 16x16 pixel grid for designing sprites, a facility to allocate them as sprites 0 to 7, and a display mode, showing actual size and reference number. A SAVE facility is offered and NEW clears the design program, leaving the operating system above RAMTOP.

Divorce from SCOPE-II creates problems. SAVE only

saves the sprites, not the operating system (in SCOPE-II, this was duplicated in the main program so it didn't matter). Here, you must always have the Designer program present, or find the memory position of the operating system, "Code" SAVE it and organise its addition to your program, if you have the expertise.

If, after running your sprites, you wish to alter them, at present you've got to start from scratch. A little re-programming will solve these problems. But the point is, ISP should have done it, not the customer. Or are programs now coming as DIY kits? **D.C.**

Drum Kit 32K BBC £9.95

Quicksilver, 13 Palmerston Rd,
Southampton, Hants SO1 1LL

Having had no experience of music or rhythm synthesisers before I've been unable to make any comparisons, but I have been able to make a few personal comments about this one.

Drum-Kit is in fact a fully programmable rhythm synthesiser with four changeable voices, the snare drum, bass drum, the electro beat and sticks. The program comes with a 17-page manual which is comprehensive but unclear in places. If you follow the examples closely you should quite easily understand what is happening. It doesn't take long to grasp the basics, and after about half an hour you're constructing quite impressive rhythms, using the simple cursor

controlled input.

You define the length of each bar and the number of bars in the rhythm then the display is shown in chunks of 16 beats. Pressing the space bar will display the next page and the next 16 beats. All rhythms and voices can be saved.

My only criticism is that the keyboard is a little slow and sometimes frustrating. Besides this the results are often satisfying and easily achieved. A welcome change to arcade games. **M.B.**

Cu*Bert TI-99/4A £6

Stainless Software, 10 Alstone
Rd, Stockport, Cheshire

Having reviewed the Extended BASIC version of this game, Q Bono, I was pleased to see this adaptation for the unexpanded TI.

The screen displays a pyramid of cubes. You guide a man along them, diagonally only, and press the space bar to change the cube colour. The object is to complete the screen by changing all cubes to the specified colour.

Continually bouncing down the pyramid, however, is a white ball. A collision with this loses a life. There's also a black ball capable of transforming itself into various creatures that may move in any direction and change back the colour of the cube it occupies. This poses more of a threat to Cu*Bert as its moves are unpredictable at times.

Although the program worked without interruption for several runs, it subsequently crashed with a Bad Value — just as success was in sight, wouldn't you know it!

Overall, I found Cu*Bert to be just as much fun as Q Bono, but was surprised that the keys were not the same. They weren't as comfortable to use, I would have preferred an option to re-define them. **J.W.**

Take your pick

Sift through this varied
assortment of programs to
find one which fits your
needs. We've got a designer,
drum kit and cube games

Breakpoint TI-99/4A £5

Stainless, 10 Alstone Rd,
Stockport, Cheshire.

Dare you load this program in your TI? It may never be the same again after an encounter with the dreaded "byte bug".

A circuit board is displayed. Suddenly one of its components fails. Your task is to guide your man between the working components to find a replacement, then install it in place of the faulty one. But we all know that where computers are involved, it's not that easy.

For a start the byte bug is out to get you and he'll happily take a life if you're caught. Then there's the splatter zaps. These appear unexpectedly and crunch round the circuitry. Worst of all are the static zaps. Unless the Q

key is pressed the instant these start, you've no chance. If this weren't enough, there's the occasional "portron transportation medium" that blocks your path. These take you to another location, usually just where you don't want to go.

Detailed graphics make this enjoyable to play and watch. My only complaint is one game had to be abandoned because the failed component could not be reached. **J.W.**

Screen Machine 48K Spectrum £8.95

ISP Marketing, 15a Castons
Yard, Basingstoke, Hants

Don't confuse this with Print'N'Plotter's program of the same title. With so many easy screen design competitors, ISP has decided to be 'different', abandoning the moving cursor line drawing favoured by others. Being 'different' seems to come down to being the same as BASIC.

There's little difference between "PRINT AT 10,10" and (10,10)" or "PLOT 128,88" and "@(128,88)" except the extra effort required to learn the 'new' language.

ISP claims Screen Machine is 'suitable for five-year-olds'. Can they read this manual?

There's some non-BASIC extras, like changing overall ink or paper without CLS, off-screen circles and filled circles (a geometric pattern filling which would be useless for, say, a face). Arc refused to work, giving 'Number out of Range' report. Automatic edging can be done by any character or graphic.

You can rotate anything printed and enlarge letters to eight times their normal size as well as fill rectangles (explanation here omits the + signs).

There are 95 extra graphics, with a copyright notice which renders them useless. Many manual examples don't work.

There are easier designers on the market, with more facilities. **D.C.**

Introducing the Sprint

UK & World Patents Pending.

It loads Spectrums four times faster than an ordinary cassette player, uses standard cassette software, and has improved loading reliability.

All for just £64.95.

The new Sprint from Challenge Research will load and save Spectrum programs at four times the speed of conventional cassette players, this even applies to standard program and games cassette software that has been pre-recorded at normal speed. All this plus improved loading reliability is available for just £64.95 inclusive of post, packing, VAT and a 12 month guarantee. The Sprint is dedicated to both the 16K and 48K Spectrum and provides an innovative but inexpensive new concept in cassette tape storage.

Use of the Sprint is simplicity itself:

- Retains the standard Spectrum commands and format.
- Advanced digital circuitry and signal processing improves loading reliability and eliminates volume setting.
- Simply plugs into the Spectrum port – no interface or external power unit is required, it even has its own expansion slot so that you can still use other peripherals at the same time.
- A full 48K program will load or save in 75 seconds rather than five minutes with a conventional cassette recorder.

COMPETITION

Intrigue your friends with an Intrigue T-shirt.

We've got 75 to give away to each of our prizewinners — and there's £40-worth of great Intrigue games as well in the first prize.

Intrigue Software, run by father and son team Dennis and Martin Webb, launched in November and now has a range of graphic arcade adventures for the TI-99/4A.

The theme of our spot the difference cartoon is taken from Intrigue's latest release, Atlantis.

Set undersea, it features Lionel, who is the star of other Intrigue games. It costs £6.95 and runs on the standard TI-99/4A.

Another TI title, Snout of Spout, is due out soon.

And, now Intrigue has a team of programmers, the firm is branching out into Commodore 64 software. The first title, under wraps at present, is a new game which will be on sale in time for Christmas.

Our first prizewinner will receive from Intrigue a T-shirt bearing the firm's distinctive logo, plus one each of all Intrigue's games.

They are: Mania, Adventuremania and Beneath the Stars, all £5.95; Lionel and the Ladders and Lionel and the Castle, both £7.95; and Atlantis, £6.95. Lionel and the Ladders and Lionel and the Castle need the TI's Extended BASIC module. All the others run on the standard TI.

The 74 runners-up will receive Intrigue T-shirts.

The prizes will arrive from Intrigue within 28 days of the results appearing in Home Computing Weekly.

How to enter

Study the two cartoons — there are a number of differences between

Intrigue T-shirts and software to be won

We're offering both software and T-shirts in this week's free-to-enter competition.

them. Circle the differences on carton B and seal the cartoon and coupon in an envelope. Write clearly the number of differences you found on the back of the envelope.

Post your entry to Intrigue Software Competition, Home Computing Weekly, No. 1, Golden Square, London W1R 3AB. Entries close at first post on Friday August 24, 1984.

You may enter as many times as you wish, but each entry must be on an official coupon — not a copy — and sealed in a separate envelope.

Important: please follow carefully the guidelines on entering — incomplete coupons and entries in envelopes with no numbers on the back cannot be considered. If you are a winner, the coupon will be used as a label to send your prize so clear writing is essential.

The rules

Entries will not be accepted from employees of Argus Specialist Publications, Intrigue Software and Alabaster Passmore & Sons. This restriction also applies to employees' families and agents of the companies.

The How to Enter section forms part of the rules.

Complete clearly and fully — if you are a prizewinner this will act as a label. Post to Intrigue Software Competition, Home Computing Weekly, No. 1 Golden Square, London W1R 3AB. Closing date: first post, Friday August 24, 1984. Don't forget to follow closely the advice in the How to Enter section, including writing the number of differences on the back of your envelope.

Englishskills II 32K BBC £11.95

Griffin, Ealing Rd, Alperton,
Wembley, Middx HA0 1HJ

I find it very difficult indeed to find anything constructive to say about this package. It strikes me that if schools, for that is who this is aimed at, choose to use a package such as this then we will never get computers accepted across the curriculum.

The stated aim is to encourage 10- to 15-year-olds in the skills needed for English O-Level and CSE classes. What this package comprises is four programs dealing with the following: metaphors, opposites, group terms (collective nouns, for those who left school some time ago)

and odd word out.

Each follows an identical format of a series of multiple choice questions presented one after another with instant feedback on the answer selected. In other words, an animated text book and not a particularly large or cheap one at that. I wouldn't recommend anyone to buy a package such as this for I'm certain that even those things which are included could all be fitted onto a few sheets of A4 paper with the answers on the back.

ease of use	60%
graphics	N/A
value for money	5%

Wordskill 32K BBC £12.25

Chalksoft, 37 Willowsea Rd,
Worcester WR3 7QP

This package, which is only available on disc, might be best described as a super hangman for not only do you have to guess the letters in a word but in all the words which make up a phrase!

It is claimed that this is a "valuable language development tool", but I can't say that I really see its potential in this light. The package is very well put together and the instructions, both on screen and in the book supplied, are easy to follow.

You have plenty of options to choose from too including a "random" option with the possibility of producing some

very strange and funny phrases and over four million of them. That doesn't help the basic problem though; is it "valuable"? Is it a teaching tool? Does it encourage "imaginative thinking" and "correct spelling"?

I can't say I'm convinced and, while I agree with the publishers that those children who are "bored" by reading text books will enjoy it, it doesn't help to overcome their boredom and may in fact reinforce it. This is a package to see before purchase, I feel.

Maths 1 Memotech MTX £10

Continental, Station La, Witney,
Oxon

Maths 1 is the first in a four-part educational series which Continental claims will "take the student to GCE O-Level standard at a pace tailored to individual needs". The program contains seven sections: each consists of displays of text and simple graphics, and a set of multiple choice questions. The sections are entitled Fractions, Percentages, Decimals, Sets, Venn Diagrams, Sets of Numbers and Number Bases.

You can step between pages by pressing single keys. The keys recognised at any point appear at screen bottom. An index facility allows you to search for a specific word, and two pages of Help belatedly explain the significance of the key characters at the bottom of each display.

Graphics are disappointing. Two trivial animated displays illustrate the division of a block into three and the operation of compound interest. There are also a few static pictures of Venn diagrams.

The entire contents of Maths 1 would fit comfortably into a 40-page booklet, which would be considerably more useful, and I doubt anyone would dare charge £10 for it. As it stands, Maths 1 is nothing more than an attempt to take advantage of the gullibility of parents.

Your micro as a teacher

Our educational software experts report back on programs for the BBC, Electron and Memotech

Storyline BBC £7.95

Daco Software, 59 Mackenzie
Rd, Moseley, Birmingham B11
4EP

This program is exactly what it says: a story writing program aimed at "children who are not normally interested in writing stories". It is claimed to help "improve your child's reading and creative writing skills" but I have my doubts about this.

It isn't that the program doesn't work as planned or that it is teaching anything untoward in a wrong manner. I simply cannot see that it will do any good at all.

The basic format is that you are offered various words, one at a time, from which to choose the

next one for your story. The words all fit a predefined sentence structure and can be combined into reasonable English but it is very hard indeed to make a story sensible. I know children like silly stories but you need a skill far beyond that which the program is designed for to even attempt a sensible outcome.

This is one of those programs where more time and thought could have improved matters greatly. In particular you need to be offered a much wider choice of words.

ease of use	70%
graphics	N/A
value for money	55%

Science 1 Electron £6.25

Shards, Suite G, Roycraft Hse,
15 Linton Rd, Barking, Essex

First I must say what a reasonable price policy this company has. For less than £7 you are provided with four separate and very well written programs and I do wish more companies could adopt a similar price structure. So what are the programs involved?

The first is called Balance and involves calculating the movement of a weight and its balancing moment. Unfortunately the examples are very simple but the graphics are very good.

There follows two Meter programs, one in colour and one in high resolution, for you to choose from.

Whilst the programs work well enough and the magnify facility is excellent, I can't really see the point in using a £400 computer for such a simple task. Also there is no demand to use the correct units which is a pity.

Therm is a similar program involving the reading of thermometers of three types and has a magnify facility too. This is of more use I feel.

Finally Light involves the prediction of refraction or reflection paths and is graphically excellent. All told the package could help those preparing for O-Level or CSE.

THIS IS THE BIG ONE!

The 2nd Official Acorn User Exhibition

OLYMPIA AUGUST 1984

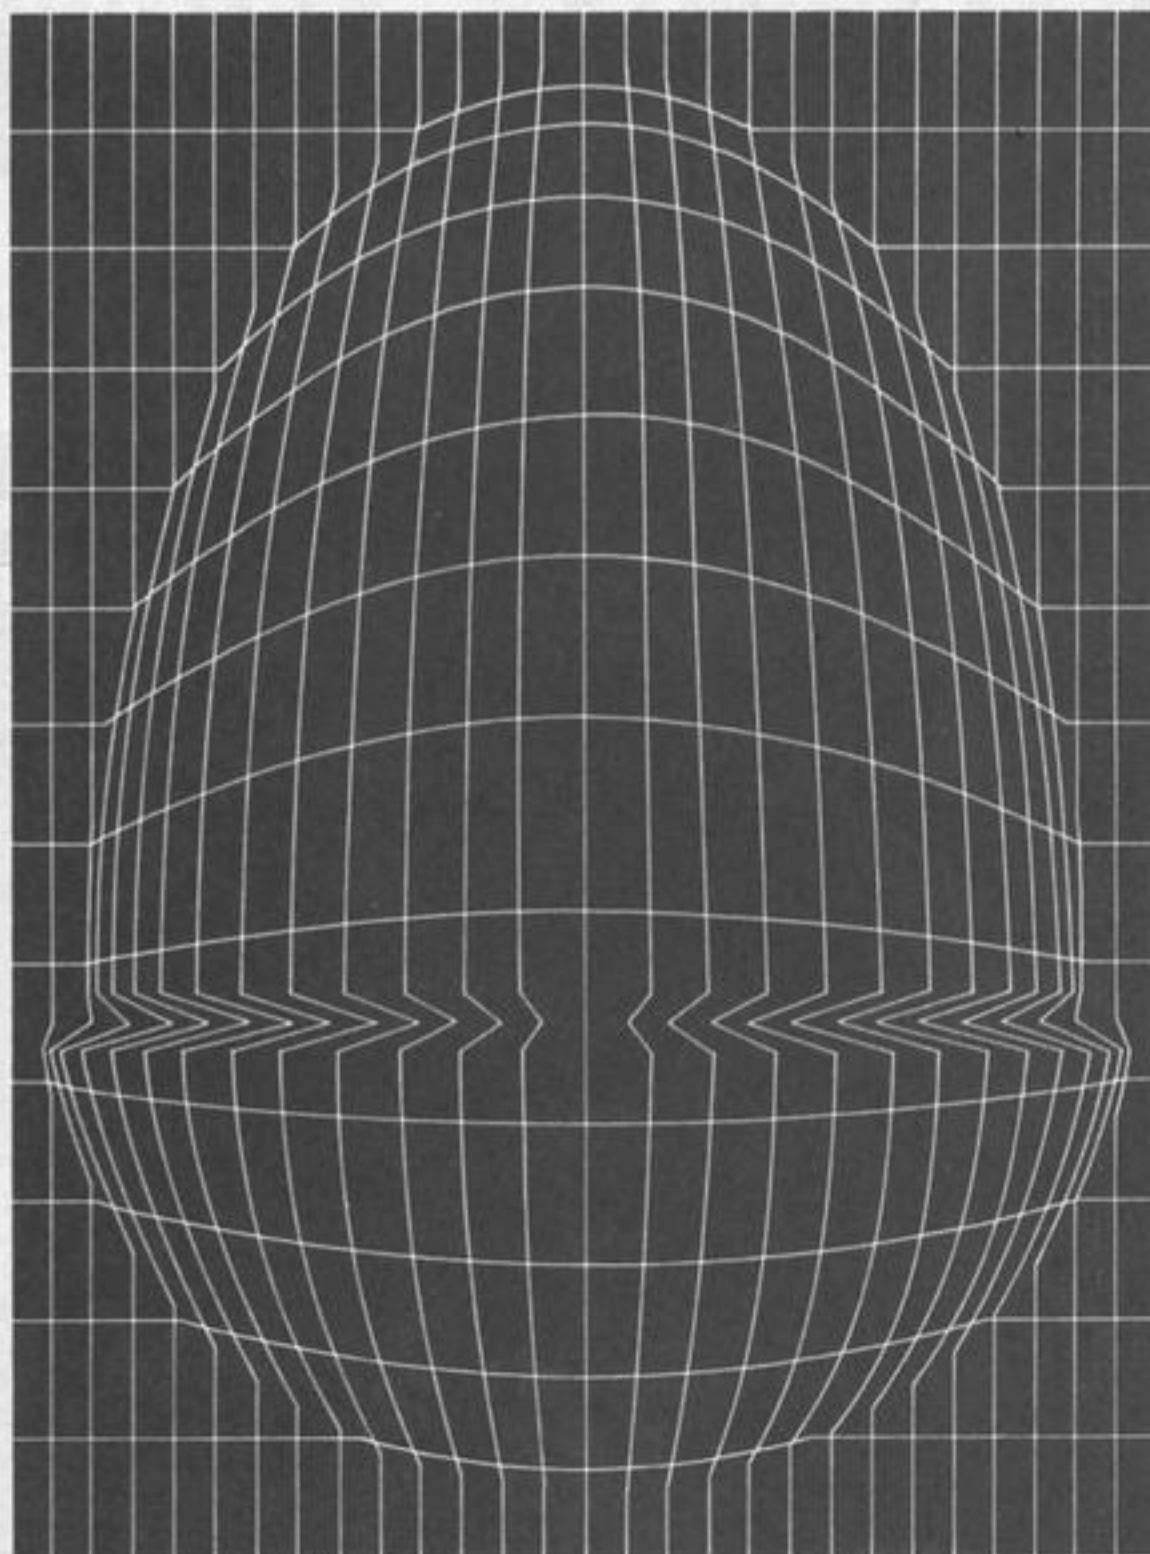

Thursday 16th – 10am to 7pm

Friday 17th – 10am to 6pm

Saturday 18th – 10am to 6pm

Sunday 19th – 10am to 5pm

* Please note 10am to 2pm on Thursday 16th
is Trade Morning – By invitation only.

BIG VALUE

The success story of Acorn Computers, the BBC Micro and Electron is mirrored by suppliers who have produced more and more hardware, software, supplies and services. And they'll all be at the exhibition – disk drives, plotters, printers, monitors, joysticks, robots, books and magazines, all kinds of software – everything for the Acorn owner.

And of course Acorn will be there in force with all their latest developments and software.

There'll be special offers, competitions, advice centres and special events as well.

And all this for only £3.00 at the door, under sixteens £2.00. (Use the coupon to beat the queues and save £1.00).

BIG VENUE

Olympia 2 is the brand new exhibition centre next to the old Olympia. It's got everything, wide gangways, lots of space to sit down and rest, plenty of catering areas.

Getting there is easy too, its got its own tube station, bus routes 9, 27, 28, 33, 49, 73 and 91 go right pass the door, and there's car parking too!

BIG SUPPORT

Remember this is the *Official Acorn User Show*, it's the most informative prestigious and influential user show in the country. Whether you're a businessman, serious user or games enthusiast there's something for you.

For details of exhibition stands and advance ticket sales contact the organisers.

Computer Marketplace (Exhibitions) Ltd. A Rushworth Dales Group Company, 20 Orange Street, London.

Pan saga cont.

In reply to R. T. Goodwin's letter (HCW 68) I too had the same problems (HCW 53).

I duly sent off the title page to Pan Books as their spokeswoman stated and received another copy of the book which supposedly had been amended. Like the first book, this was a disaster. The programs still don't work.

The reason why R. T. Goodwin cannot get reversed characters on his VIC-20 is because they are only used on a Commodore 64. Several of the programs have bits and pieces which would only work on a 64.

P. R. Taylor, Birmingham

Even more on Pan...

Mr R. T. Goodwin's letter (HCW 68) has saved my sanity! I also have been having problems putting in listings from Pan's Sixty Programs for the VIC-20. I was beginning to wonder what I had done to have got so many apparently good games into such a mess. I intend to write to Pan and it would be nice if I got a positive response but I may only be dreaming.

By the way, don't blame the writers too readily. If you have seen a copy of Micro Wars for the Commodore 64 you'll know what a smashing book it is. The writer Humphrey Walwyn is responsible for that. How about him saving me time by rewriting the smaller programs for the expanded VIC-20?

Please keep on doing listings for the VIC-20. There's still a lot of us left out here, you know.

G. D. Young, Harrow, Middx.

Where are you, Alan

Please can any reader tell me where and how I can get the AtariSoft games advertised in all the monthlies? I've sent three letters to Atari, two to London and one to the USA but have had no reply (perhaps they were too busy working out how much cash they lost last year).

Does anyone have any

AtariSoft games at all? If so, perhaps they could recommend some for the Spectrum, TI-99/4A or IBM PC (ho ho).

If anyone is thinking of sending off to Atari for details I would advise them not to bother as it would be a waste of your time and money, from my experience.
Mike Curtis, Weymouth

Stuck on Mad Martha

Help! I am a married woman with two children and we have a 48K Spectrum. Can anyone please tell me how to get out of the room with the couch and the picture in Mad Martha? I've tried everything.

I also need help in Manic Miner. The door is at the top and after collecting all the items I go up to the top ledge and jump for the door but nothing happens.

I would be grateful if someone could help me.
Mrs A. Smith, Angus

Look in the caves

In reply to S. Ward's letter (HCW 69) about Pirate Cove, I can help him. Once you have got to the island, check the cave at the top of the hill and explore the caves at the bottom.

It would also be a good idea to check the rug and the attic. You might also go for a swim but be warned — you're not a very good swimmer.

I would also like to know if any reader has a list of POKES for the VIC-20 or a program to list them.
C. Brecken, Whitley Bay

Change those zaps

The bug in the Oric program Attack of the Marshmallows (HCW 69) is extremely easy to find — all that had to be changed was:

```
760 PLOT SX, SY + 1, CHR$(3) + "xy"
```

The graphics were very nice but I thought the sound effects were dull. I'm sure many Oric owners find the zap, shoot sounds are over-used in many programs, so here are a few changes for the better:

```
2180 SOUND1, N*37, N12:
```

```
UNTIL N = 37:
SOUND 1,0,1
3000 S = S + 100: SOUND
1, S/5, 10
10130 PLAY 7,0,1,2000:
MUSIC 1,2,1,0: MUSIC
2,2,4,0: MUSIC 1,2,8,0
15012 PLAY 7,0,1,2000:
MUSIC 1,1,1,0: MUSIC
2,1,4,0 MUSIC 1,1,8,0
```

Another point I'd like to make is that in some lines, for example 15000, there is a long line of spaces to be plotted. Typing this in would be much easier if there were a REM statement at the end of the line telling you how many spaces there were.

But on the whole it was an above average listing and well worth typing in.

Some Oric owners may still not know how to speed up or slow down the Oric's autorepeat. POKE 775,10 will make the autorepeat go at its fastest speed, POKE 775,255 at its slowest. Note that if you POKE this location with a number under 10 the computer will crash. POKEing this location also affects the speed of the computer.

Thomas Jankiewicz, Slough
Software winner

Cheap games are great

I'd like to congratulate Mastertronic and Atlantis for their great games at only £1.99. I have £1 pocket money a week, and I save part of it so that every three weeks I can buy a new game.

Can anyone tell me how to get past the tubes on Voodoo Castle for the VIC? They keep blowing up.

Finally, does anyone know if there's a soccer program for the VIC-20?
Matthew Davenport, Basford

Give me a clue

I am writing out of desperation. Can anyone help me with the Golden Baton?

Has anyone beaten my high score of 45,000 on Fred by Quicksilver or 46,000 on the Snowman, where I finished all levels?
Brendan Gorman, Downpatrick, Co. Down

Piracy is the problem

I'm writing to tell you what a big problem software piracy is. As far as I can see only one company has defeated piracy, and that's Bubble Bus.

All computer owners have pirate copies of games. In fact one of my school friends has over 50 pirates. I too have about five copies.

I think the only way to stop this problem is by making it legal. This will take all the challenge out of piracy. Remember when CB radio was illegal? Everybody wanted to join in then, but now it's legal nobody's interested any more.

By the way, any Commodore 64 owners who want good games — try Jammin' and Super Pipeline by Taskset. They really use the Commodore's capabilities to the full
Tony Murphy, London NW10

Good games

I'm yet another proud TI-99/4A owner and I'd like to recommend two adventure games to every TI owner. They're Adventuremania and its follow-up Mania, a great game with good graphics. Both are from Intrigue.

By the way my high score on Munchman is 57480 and my highest percentage on Adventuremania is 63.
Stephen Woodhouse, Huddersfield

Hobbit help

I've solved the Hobbit on the Commodore 64 and if anybody is stuck send me a s.a.e. and I'll be glad to help.

Patrick Nesbitt, 42 Belmont Rd, Courthouse Green, Coventry CV6 5LF

Sound advice

When experimenting with sound on my TI-99/4A I found that using this sound statement gives good results.

```
CALL SOUND (-4250,110, 0,111,0,112,0)
```

Nigel Beeden, Cotgrave, Notts

QL has Hiccoughs

The Sinclair microdrives, designed for use with the Spectrum, have now been on the market for almost a year. With the launch of the QL with its inbuilt microdrives, there has been some debate as to whether they are speedy, sturdy and reliable enough for use with a machine intended for small business use.

I have been using my QL extensively since it arrived recently and find the Psion business software packages extremely good in that they are designed for immediate use, yet have more complex and powerful features which will take time to master.

Quill, on which I am writing this, has to make frequent access to the microdrives which slows things up somewhat. Within hours of the machine's arrival one of the blank cartridges (eight are supplied free with the computer) developed a fault and I had to return it for replacement. The cartridge in question simply gave a hiccough and popped out of the computer with a loop of tape visible entwined around the drive shaft of the microdrive. I carefully removed it, making sure not to damage the tape, and managed to return the tape to its case but it then proved impossible to reformat it. As with discs, all cartridges must be formatted before they are ready for use.

Sinclair Research was most prompt in sending a replacement and overall my opinion of the machine is that it is most impressive.

Ann Close, Sutton, Surrey

Send your letters to Letters, Home Computing Weekly, No.1 Golden Square, London W1R 3AB. Don't forget to name your computer — the best letter could win £5-worth of software. Got a problem with your micro? We'll soon be starting a queries page, so send your technical questions to Queries at the above address.

Space Shuttle by Simon Eyre

In a distant galaxy scientists experimenting on a planet's surface are taken captive by a super race that has the resemblance of a lovable pac-man ghost.

Every day one scientist is allowed to walk in the planet's many tunnels to collect food.

While the scientist is in the tunnel your space shuttle can try to land and pick him up. You must then return to the mothership. Your task is made harder by rocks that hover above the planet blocking an immediate path to the landing bay.

Your controls are: Z Left C Right F1 Eject F7 Thrust.

Thrust can shatter the rocks away from you only when you travel downwards. You only have enough fuel to thrust five times.

Variables

Capital City Quiz by George Sykes

Revising for geography exams? My program randomly asks questions about capital cities and is easily changeable for other subjects.

How it works

1-150 credits and title screen
200-330 reads data and displays question
500-550 if answer correct flash screen and play tune
600-650 if answer incorrect, display answer
1000-1210 DATA
2000-2060 subroutine for "fail"; sound
3000-3090 subroutine for "correct" sound

Variables

AS, BS question and answer strings
L length of answer strings
S subtracts L from 40 divides by 2 to place Qs and As in centre of screen
X RND integer for data reading
RS player's input from prompt
Z number of guesses
F start of count to flash screen
TN used in sound routine for stepping notes

By altering the DATA, it could be changed to, say, a history quiz (monarchs, prime ministers) or chemical symbols and so on.

And if you change lines 230-300, it can be made into a multiple choice quiz where only one of the alternatives is correct.

You could even make it more frustrating by not displaying the correct answer!

All the DATA lines have

been checked against the 1984 edition of Collins' Atlas of the World.

Hints on conversion

The only POKEs are:
53280 BORDER colour
53281 SCREEN colour
54272 start of sound chip
The sound routine could be discarded (lines 2000-3000), as could the flashing screen (lines 400-510).
The data can be shortened (lines 5,210,230 are altered to produce different values).

Enjoy a game of space shuttle and then test your geography in these two listings for the Commodore 64

COURSEWINNER

The Punters Computer Program

COURSEWINNER allows you to use the power of your computer to get the edge on the bookmaker.

- COURSEWINNER contains a database full of detailed information on all English and Scottish flat courses. The ten leading jockeys and trainers, and effect of the draw is detailed for each course.

This information can be displayed on the screen at any time.

- The program analyses these factors combined with the results of the last three outings, starting price and weight carried.

- COURSEWINNER is simple and quick to use, yet very powerful.

- Boxed with detailed instruction booklet.

Price £12.50 all inclusive IMMEDIATE DISPATCH (RETURN OF POST)

Available for:

SPECTRUM (48K), BBC (B), COMMODORE 64, DRAGON, APPLE II/IIe, ATARI (48K).

POOLSWINNER

The Ultimate Pools Prediction Program

- POOLSWINNER is the most sophisticated pools prediction aid ever produced. It comes complete with its own massive database.

- Can be used for Scoredraws, Draws, Aways and Homes.

- The database contains over 20000 matches (10 years league football). It updates automatically as results come in.

- The precise prediction formula can be set by the user. This allows development of your own unique method.

- Package is complete with program, database and detailed instruction booklet.

Price £15.00 all inclusive IMMEDIATE DISPATCH (RETURN OF POST)

Available for: SPECTRUM (48K), ZX81 (16K), BBC (B), COMMODORE 64, DRAGON, APPLE II/IIe, ATARI (48K).

Available from dealers or direct (return of post) from:

PROGRAMMERS

£1,000 REWARD!

We are offering a prize of £1,000 for the best arcade game program submitted to us by August 31, 1984 for either the 48K Spectrum, Commodore 64 or Amstrad. The program must be your own copyright which will be assigned to us on presentation of the award. The winner will also receive royalties based on our normal, escalating royalty package, for all copies of the program sold for any home computer. To enter, submit a copy of the program together with full operating instructions to:

R M Summers
STERLING SOFTWARE

Garfield House
86-88 Edgware Road
London W2 2YW

The decision of the publishers will be final and the name of the winner will be announced in the computer press.

Sterling Software is a division of Sterling Publications Limited.

Sitting the

Ebony and ivory... and all that. Now you can use your Spectrum to play tunes. Make music on your micro — and this time you don't have all the bother of searching through your ZX manual for the BEEP values.

Sit down at the keyboard and compose a musical masterpiece, a true original. You can pause after each note to write down

the values if you wish, and highlight the key you pressed. Look at the screen dump representation of the keyboard.

Your options are any note from eight octaves, variable note length, and if you haven't quite got the hang of composing yet you can delete a note or the whole tune, if it's a disaster.

This is a sophisticated program which caters for sharps, flats and rests.

How it works

10-20 set variables, set caps lock and change input cursor to ?
30-110 print keyboard
120-150 print instructions
160-330 check for keypress, BEEP if note pressed
350-380 add pitch and length value to AS for playback (pitch = 69 for pause)
390-400 change pitch
420-430 change note length
440 delete note
470-590 play tune
600-620 delete tune (reset AS)

Variables

AS data for tune
NS last note pressed
BS data for last note
L note length
T used in FOR... NEXT
P pitch
ZS, XS used in playback

Conversion

The sound and string handling commands are different in the Spectrum from those used in most other computers, so conversion will be difficult. Here is a list of some of the commands used:

BEEP duration (in seconds), pitch
STRS convert numbers into strings
LEN (XS) return the length of XS
Val opposite of STRS, convert strings back to numbers
POKE 23658,8 set caps lock
POKE 23617,236 set input cursor to ?

Although the program appears lengthy, lines 200 to 330 differ only slightly and can be quickly entered by editing the previous line.

at my piano other day...

CALLING ALL PROGRAMMERS . . .
WANTED New, Quality Software.
Send us your latest Program
for evaluation - NOW.

AVAILABLE FROM LEADING DEALERS NATIONWIDE

You're under starter's orders, so be prepared to get into gear, let out the clutch, depress the accelerator and we're off!

Everything is at stake in this game. You only have one chance so all your effort must be put into maintaining a steady course and avoiding trees. If you crash into a tree you've had your chips and the game ends.

Instructions are included in the program.

How it work

- 100-140 initialize game
- 150-410 draw screen
- 420-610 main game loop. Move car, check for crash
- 620-790 end game routines
- 800-890 difficulty level selection
- 900-1090 redefine charcters
- 1100-1360 instructions

Variables

- W,E position of car
- SC score
- HI hi-score
- Z,S,B,A, draw screen
- TREE ASC code of character at W,E
- T,J common delays
- AS inputs
- DIFF difficulty level
- CH, CHORG character redefinition
- CHAR read DATA to be POKEd into new character set

Hints on conversion

- GRAPHICS 0 set screen to 40 x 24
- POKE 752,1 turn cursor off
- POKE 752,0 turn cursor on
- POKE 756,A/256 enable characters
- POKE 710,192 green screen
- POKE 82,0 set left margin to 0
- CHRS(32) ASC code for SPACE
- POSITION position cursor at ROW, COLUMN
- PEEK(764) last key pressed
- SOUND CHANNEL, NOTE DISTORTION, VOICE
- LOCATE return ASC code for character at ROW,COLUMN in last variable
- Replace lines 1020-1212 with your micro's own character redefinition routine.

"EVEN THE JORMANS ARE BUYING IT" *Pet*

Yes a great new 3 part game based on the popular TV series "AUF WIEDERSEHEN PET" from the Newcastle-based computer software company Tynesoft.

Judging by both advance and actual sales this tape will reach "Jet Set Willy" proportions, even the Germans are buying it.

"SO DIVENT HANG ABOUT KIDDA" contact Tynesoft on 091 414 4611 or write to TYNESOFT, ADDISON INDUSTRIAL ESTATE, BLAYDON-ON-TYNE, TYNE & WEAR.

Wordgram 32K BBC £7.95

Daco software, 59 Mackenzie Rd, Moseley, Birmingham B11 4EP

The stated aim of this program is to teach the principal parts of speech in a practical way.

In fact, it is a story writing program in which you form your story from the various word types offered and after choosing a type of word, e.g. verb, you are offered alternative verbs from which to select the one for your story.

It covers the following parts of speech; nouns, adjectives, pronouns, prepositions, verbs, adverbs and conjunctions. It also has two levels of difficulty which change the category titles of the words offered.

The idea is that you start with verbs being described as action words before you use the correct title in level 2. The program is based on a good sound idea and is more likely to foster a good understanding of the structure of English than say the old grammars with which you may be more familiar. The stories you create are not, however, checked in any real way and if you insist you can write complete nonsense (no this review was not written with the program!). Despite this, children will find the idea interesting to say the least. **D.C.**

Frac Attack 32K BBC £6.75

Shards, 189 Eton Rd, Ilford, Essex IG1 2UQ

There is no doubt that if you want value for money in your software Shards' Fun to Learn series tries very hard to give it. This is the third I have seen now and they seem to get even better each time.

The subject of this package is fractions but it doesn't comprise just one game with a number of levels — there are six games, all very different. Despite this, they are all contained within one master program so there is no extra loading time.

The games are: Shady Fractions, Frac-Attack, More or

Less, Beam up, Strong Arm and Hungry Radish. They cover, well and interestingly, the areas of fraction identification and the changing of denominators but don't deal with addition or subtraction of fractions.

This is perfectly reasonable and the amusing graphics and sound will really motivate the nine-15 year olds the program is meant for. Whilst this program won't teach the concepts it will certainly motivate children to get plenty of practise. **D.C.**

Chemical Simulations 32K BBC £13.80

Acornsoft, 4a Market Hill, Cambridge CBN 3NJ

Three A-Level chemistry programs designed to be used in the same way as the company's Chemical Analysis. The first program, IR, deals with infrared spectroscopy which I found was not in my A-Level syllabus, and was difficult to understand and follow.

The booklet, usually very good, was sparse. However, to be fair it did look impressive. A graph of a spectrum of a simple organic compound is shown. You then have to guess the number of various atoms which constituted one molecule.

PH curves may be drawn and, by using different limits, obtain varying degrees of accuracy. A short test is followed by one on the mathematics of titration curves where you must correct errors in given statements. A calculation of the pH of solutions employing a good press to reveal line by line system follows. A very good program that I would highly rate.

Organal displays a list of 18 organic compounds covering a range of functional groups. There is a list of questions that may be asked by the student. A good program. **K.L.**

Top of the class

Our hard-to-please reviewers gave these computer tutors a pat on the head. Read on to find out why they rate them highly

Readright 32K BBC £9.95

Daco Software, 59 Mackenzie Rd, Moseley, Birmingham B11 4EP

Unlike many educational offerings we see nowadays, this package provides a real and extended range of options which can be used for children either as they develop skills or at a range of attainment levels.

The program is for the children at the early and intermediate stages of learning to read and is meant to help in two main areas. It encourages the use of contextual cues while reading, by always offering a word to be fitted into position in a sentence already on screen, this is a very good and helpful method to adopt. It also encourages

phonics, as the program will split up the words into their constituent phonemes for your child to sound out.

It needs to be emphasised however that this will only be of help to your child if this matches the method used in its school and should not be used without consultation.

The best feature is the placement program, or test, which should be used before using the others and will advise you on which of the seven main programs to use and even which of the levels to try. A little visual encouragement would have been nice though. **D.C.**

instructions	90%
ease of use	90%
graphics	N/A
value for money	85%

Mathskills I 32K BBC £11.95

Griffin, Ealing Rd, Alperton, Wembley, Middx HA0 1HJ

This package is aimed at the 10-to 15-year-old who is preparing for the O-Level or CSE mathematics examination. It is a teaching package which, it is claimed, will help you to learn mathematics. This I don't feel to be fully true.

What a package such as this will do is give you practice and develop skill in answering the type of questions included by the method proposed. This is not the same as learning mathematics and can only be described as a part of the whole. The package covers long multiplication, long division, highest common factor, lowest common multiple and fraction manipulation.

The approach is fair, with a worked example being followed by questions for you to answer. In some cases there is a help facility, in others there is a step-by-step checking of answers, so that you are unlikely to get the wrong method fixed in your mind. Having said all this, the programs are no more interesting than having a self-correcting text book. While this may be helpful to some, it does nothing to attract the slow or reluctant learner. **D.C.**

Learning boom for software

Here's a software marketing riddle. Last year there wasn't one, and this year it is significant. Any guesses? I'm talking about the educational software market (of course!)

Most computer retailers consider that educational programs now account for up to 30 per cent of total sales. At the start of last year, the total educational software market was estimated to be around two per cent. Not bad for the year's growth.

The reasons for this rapid growth are the pronounced increase in the number of computers now in U.S. homes and schools, national advertising schemes used by some hardware manufacturers which feature children learning with computer assistance and the better selection of quality programs. The market that educational software companies were only talking about two years ago is rapidly turning into a significant portion of the total market.

Some of the leading makers of educational software include Spinnaker and HES. A couple of reasons why the products of those companies sell so well is that, aside from being well packaged and useful, the programs are fun to use and low in price. Parents don't appear to want to buy programs which aren't fun and are unwilling to spend \$40 and up for software to run on a computer that may have cost less than \$100.

One large gap that still remains is for programs made for children in high school (ages 13-17). Most of the programs available are based on some sort of drill theme, mostly suited to children in the primary grades. Although there are a few programs designed for use by those preparing for the Scholastic Aptitude Test (SAT), a college entrance exam, most parents, though, are unwilling to spend \$80 on this program that may only be used once or twice. According to many market analysts, growing consumer interest, school district interest, and new programming techniques all link to lead to the expectation of strong growth in the educational market in the near future.

If you can't wait to jump on the microflop floppy bandwagon, Amdek has the answer for you. The AMDC-I and II are three-inch drive systems that will work to provide 180K (I) or 360K (II) of formatted storage capability. Interfacing is a breeze as both microflop floppy drives have built-in intelligent controllers which are fully compatible with the Atari line, using the DOS/XL operating system. Suggested retail prices: \$599 for the AMDC-I and \$850 for the AMDC-II. You should be able to get details on these units from your local (Atari or Amdek) dealer.

A new word processor, introduced by Prentice-Hall, called SkiWriter II also contains a communications program and is being touted as a very powerful low cost package. The program comes packaged in a ROM cartridge designed to be plugged into such machines as the Commodore 64, PCjr, and Atari computers. The unit uses a 16K ROM and is very easy to use, fast, and versatile. In addition to the usual word processing features, it offers a Capture function which turns the computer into a "smart" terminal capable of downloading information being sent by another computer and to store that information on either cassette or disc or even put it directly into a document being edited by the word processor.

Because of this type of communications option, this program could set a new standard in what can and should be expected from low cost programs. Ken Skier, author of the program and president of Skisoft in Lexington, Massachusetts, apparently has had quite a lot of experience in squeezing a lot of code into a small space in order to run on smaller computers. For example,

the original word processor on which SkiWriter II is based, was designed to be housed in only 8K inside a ROM chip in the Epson HX-20 lapsize computer.

Skier also has experience working for Wang, maker of dedicated word processors. Expect SkiWriter to become available later in the year, probably around October or so. For \$69.95, it should be well worth the wait.

Axonix, of Salt Lake City, Utah, has introduced its model ThinPrint 80 printer, a high performance full page printer which uses thermal printing techniques and runs on rechargeable batteries. It weighs about four pounds and is quite compact in size, being able to fit comfortably inside less than half of an average size briefcase.

Features include 40 characters per second, bidirectional printing capability, a 2K buffer, 80 or 136 characters per line, serial or parallel interfacing, and will accept either single sheet feed or continuous roll feed. The firm claims that the graphics resolution of the ThinPrint 80 is the highest offered by a battery operated unit. It will produce resolution of 960 by 7 dots per line which can be used to produce graphs, charts, and pictures of facsimile-like quality. All this for a mere \$279. This price includes a set of rechargeable batteries, an A.C. (mains) adapter, and an 80 page roll of paper.

Even software manufactures which have made their reputations for high quality games have also been getting their feet wet in the "serious" marketplace. A good example of this is Broderbund, whose Bank Street Writer is doing very well indeed. It is designed to be a low cost easy to use home machine oriented word processor. Another good example is the Synapse company, also a top games publisher. It has just recently come out with a programme called Relax, which is designed to help users lower their stress level and be able to learn how to take it easier. And when you live here in California, **nothing** is more serious than that!

Science-fiction buff that I am, it was impossible to pass by the notice that the well known publishing firm of Simon and Schuster is planning to distribute a line of sci-fi computer games. Not only that, but these games have been written by well known sci-fi authors such as Robert Heinlein, Fred Saberhagen, Jerry Pournelle, Larry Niven, and Stephen R. Donaldson to name but a few. Among the various titles to be distributed, look for Wings Out of Shadow, by Saberhagen; Snake!, by John Chenault; and Starclash II, by Stephen Walton. These should be out soon.

Coming later in the year will be Animal Love, by Donaldson; The Game of Empires, by Poul Anderson, Glory Road, by Heinlein; and Inferno, by Niven and Pournelle. The game series will retail from \$24.95 to \$34.95 and will run on Apple, IBM, and Atari computers. I don't know about all of them, but I can tell you that Jerry Pournelle is quite a good programmer in addition to his other skills, and that he has put quite a lot of effort into Inferno. These should be quite an excellent series of games.

Time to go time. Till next week...

Bud Izen, Fairfield, California

PROGRAM FOR PROFIT WITH YOUR SPECTRUM

Software has now outstripped the areas of basic and simple machine code programs. Do you have the ideas for games but not the know how to produce the code required? Are you put off by the complexities of writing complicated routines?

Have you the problem of finding the time to write that great adventure or arcade game? Professional software houses use special programs to help them generate their product. Now there is available to you a package of commercially marketed programs with which you can write your own text adventures, graphics adventures and arcade games. Packaged together with two books on arcade and adventure programming and sent to you with a Free copy of our fact sheets "Programming for the games market", which includes many hints and tips and a Softwarehouse directory, you can now compete with the top games writers. (Programs include The Quill, Dungeon Builder, White Lightning.) Purchased separately these items would cost you £49.75. As a special offer we are packaging the items at £42.75 a saving of £7.00.

Send for your pack or send SAE for further details to
